Executive Summary

Visionary **AI / Data Engineer** and promising tech **leader** with **8+ years of experience** building scalable data platforms, AI-driven products, and leading cross-functional teams. Co-founded and scaled a data analytics startup from concept to market. Proven track record in **cloud architecture (AWS, Azure, GCP)**, **AI/ML integration**, and aligning technology strategy with business objectives.

Leadership & Entrepreneurial Experience

Software Consulting Service LLC — *Co-Founder & Chief Operating Officer*

2021 – 2022

- Co-founded and bootstrapped **Mongolia's first Business Data Platform**
- Led product development from ideation to market launch (www.252.mn)
- Owned end-to-end technology strategy using **Agile** methodologies
- Built and mentored the engineering team; established development standards
- Aligned technical roadmap with business goals and market demand

Mongolian Data Club — *IT Consultant / Data Architect*

Oct 2022 – Present

- Architected enterprise-grade data solutions using **Google BigQuery**
 - Provided strategic technology consulting for organizations
 - Mentored and trained community members on modern data technologies
 - Designed **cloud-native architectures** with scalability and security best practices
-

Technical Leadership Experience

StableLab — *Senior Data Engineer*

Jun 2025 – Present | Remote (Web3 / Blockchain)

- Lead Web3 data engineering initiatives for blockchain analytics platforms

- Architected distributed **ETL pipelines using Prefect**
- Implemented data governance frameworks for **DeFi applications**
- Applied anomaly detection on telemetry streams to improve signal reliability

Predikt.ai — AI / Data Engineer

Feb 2025 – Oct 2025 | Europe (Contract)

- Engineered AI-driven forecasting platform on **Databricks**
- Built procurement automation tools for enterprise CFOs
- Improved prediction accuracy by **20%** through ML optimization
- Developed petabyte-scale data lakes using **Delta Lake**

Wobby AI — AI / Data Engineer

Aug 2024 – Mar 2025 | Contract

- Developed AI agents with **text-to-SQL** capabilities using **LangChain**
- Integrated real-time ML pipelines for automated business insights
- Collaborated closely with product teams to align AI features with user needs

Zero Technology LLC — Senior Data Engineer

2022 – 2025

- Led data platform engineering for **GS Retail (enterprise scale)**
- Optimized large-scale **Apache Spark** processing pipelines
- Implemented ML-based anomaly detection for sales and inventory signals
- Mentored junior engineers and fostered a strong knowledge-sharing culture

Gobi Cashmere — DBA/Data Engineer

2020 – 2021

- Led data warehouse development for inventory management
- Implemented real-time data streaming using **Apache Kafka**
- Built ML-based demand forecasting models, reducing stockouts by **15%**

MCS Group / M Bank — Data Analytics Engineer

2018 – 2020

- Led cloud migration initiative (**on-prem → AWS**)
- Designed compliant ETL pipelines for financial data
- Implemented data governance and regulatory compliance frameworks
- Built risk and anomaly detection systems for transactional data

Technology Expertise

Cloud & Architecture

AWS (Redshift, Glue, S3), Azure, Google Cloud (BigQuery), Databricks

AI / Machine Learning

Scikit-learn, TensorFlow, PyTorch, Spark MLlib, LangChain, MLOps

Data Platforms

Apache Spark, Kafka, Airflow, Hadoop, Delta Lake, Prefect

Programming Languages

Python, SQL, Golang, Java, TypeScript

Databases

PostgreSQL, MySQL, MongoDB, Cassandra, ClickHouse, DuckDB

Education

Bachelor of Science in Computer Science

Mongolian University of Science and Technology

2013 – 2018

Key Achievements

- Co-founded and scaled a national-level data platform from scratch
- Led enterprise data platforms processing **petabyte-scale datasets**
- Delivered measurable business impact through AI (forecast accuracy, stockout reduction)
- Recognized mentor and technical leader across multiple organizations
